

TRACE **HEATING** SERVICES

Protect your water pipes from the frost
Effective plug-in electric heater cable
Easy install for plastic and metal pipes
Economical to use (low running)

- Measure your pipe and select the kit to suit.
- Ensure you have an adequate electrical supply
- If outdoors ensure your electrical socket is weatherproof

Run heating cable straight on the pipe and apply adhesive tape along its length

Apply Thermal insulation and seal down the joints with tape provided

Place the caution labels on the outer surface to ensure a safe installation

Plug in to your supply, switch on and you're protected for the winter!

We recommend that all heaters are protected with an RCCD socket.
